

The diagram shows a single-stranded RNA molecule. At the 5' end, there is a blue circle representing the 5' cap. The RNA sequence is represented by a chain of nucleotides, each consisting of a sugar (blue circle) and a phosphate group (yellow circle). The sequence is: 5' Cap - G - C - A - U - C - U - U - U - G - G - C - U - C - A - G - U - U - C - U - U - A - U - A - U - A. The 3' end of the molecule is labeled with a blue circle representing the 3' poly-A tail.
