

A diagram of a single-stranded RNA molecule. The sequence of bases from left to right is: G, U, C, G, U, A, C, U, C, G, U, A, G, C, U, A, C, G, A, A, U, C. The bases are color-coded: G (green), U (blue), C (red), A (orange). Vertical lines connect complementary bases: G-C, U-A, C-G, G-C, U-A, A-U, C-G, U-A, G-C, C-G, A-U, A-U, U-A, C-G. The 5' end is at the top left, and the 3' end is at the bottom left.

[illegible]
